***SWEEPS THE FIELD!***

# TRIUMPH

# PRESENTS THE

STEP UP TO A NEW LEVEL OF ADVENTURE-IN-MOTION

## **NEW PERFORMANCE - NEW VALUE NEW DAY-BY-DAY RELIABILITY**

Triumph — world pacesetter of design for over 50 years again says — no, motorcycles have not reached the apex of achievement in our modern, scientific world.

They can and must be developed further.

After our '64 design breakthrough, many said we couldn't exceed our own record-excellence again. But our organization of designers and production experts has done just that. New levels of innovation, power and reliability have been reached. The outcome? High Adventure for those who are ready to take advantage of it.

**Make your next move — a triumph!**

## **DON'T HANDICAP YOURSELF!**

Every rider wants to get the most fun out of his motorcycling dollars. That's why you should look carefully before you buy. Look past advertising claims and you'll find a Triumph is your best buy — dollar for dollar. The Triumph power and reliability spell **fun** for you wherever you go, be it on the open road or in competition riding.

Triumph operates a parts service, second to none, coast-to-coast. Speed tuning, competition and racing parts are available for Triumph twins and lightweights. Also accessories are available from your Triumph dealer.

Triumph continues to outsell all other vertical twins in the U.S.A.

Your Triumph dealer invites you to inspect and test-ride the new Triumph line for 1965.
