A breed apart.

The Triumph 500's

The speed twins. A distinguished pair of performers bred to satisfy your need for controlled power. Dreaming of a well-behaved, responsive tourer with race proven features? The name says it all, Daytona. See that other clean-lined beauty cutting cross-country, levelling the hills, rolling lightly over rough terrain? That's the spirited Trophy 500. Both of these sleek fire-eaters are powered by the same highly refined OHV vertical twin.

The Daytona earned its name at the famed Florida oval, where it set completely new performance standards for its class. It features twin 26mm Amal concentric carburetors feeding into true hemispheric combustion chambers for outstanding acceleration. A high compression ratio 9:1.

Separate point adjustments for precision ignition timing. A rugged single, down-tube frame design that has made the Daytona one of the sweetest handling bikes on the circuit. Illuminated tachometer and speedometer and an anti-theft frame lock.

The Trophy 500 has all of the Daytona's pacesetting qualities in a trail bike configuration and the kind of performance that has made it Grand National Enduro Champion seven times running. A single 26mm Amal concentric carburetor for simple, foolproof adjustment and long-term reliability. Specially designed front forks and adjustable Girling rear suspension with heavily chromed outer springs. A choice of either rugged, super-traction Dunlop Trials Universal trail tires or

K70 Gold Seal road tires. In addition, it offers a variable steering damper for just the right road feel. Adjustable clutch and brake levers to personalize the ride and a protective, heavy duty skid plate.

Nothing you have ever heard, seen or felt before can adequately prepare you for the experience in store for you the first time you climb aboard either of these proven performers. Power, handling, response...on or off the road, that's the natural heritage of these finely bred twins.

If you want to step up in class, take a giant step with the Triumph 500's. You'll never look back.
